

Josh's Coding Space (A personal portfolio)

Short Pitch: Here is a list of my programming abilities in action. I have worked in the Unity Engine and I have knowledge of C#.

Long Pitch: This website is here to be a portfolio for examples of my programming ability. I have decent knowledge on C# and I am always learning more. On this site, you will find examples of my programming in action, with mini sections of games that I have helped make. I will also include a separate link to view the code itself so you may see how I write.

Personas:

Sally Smith: a 40 year old C# programmer at Bethesda Studios. Has 2 kids and a husband, lives in Rockville, Maryland. Became a programmer due to love of the NES and SNES growing up. Went on this site to look for a potential new employee.

Adrian Brown: a 16 year old high school student who is interested in programming. Took a coding class freshman year of high school and found his love for it. Went on this site to see examples of what a novice developer can do.

Competition:

Zeekerss, who is the creator of the video game Lethal Company.

Toby Fox, who is the creator of Undertale.
